

As material feeding pump for airspray applications, the WAGNER TOPFINISH DD10 enables savings of up to 70% in flushing agent and material consumption.

With the air-operated double diaphragm pump, high-quality surfaces can be achieved even without the use of a material pressure regulator. In addition, the process costs are considerably reduced by the pump. Among other applications, it is suitable for coating furniture or plastic parts of transport vehicles.

- Diaphragm change in less than 15 minutes
- Perfectly suited for supplying manual and automatic airspray guns and 2-component systems
- Pulsation-free material flow without material pressure regulator

### Easy to use & time-saving

Equipped with two precisely adjustable rotary controls for the pump pressure and atomizing air.

### Fast maintenance

For maintenance of the pump the user only needs four standard tools.

### Uniform spray pattern

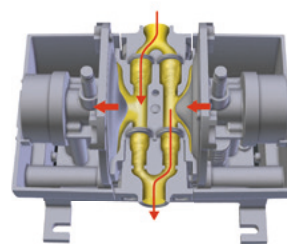

The pump concept enables pulsation-free operation for an optimal coating quality.

### Flexible applications

All wetted parts are made of nickel-plated aluminum. This means that a wide variety of materials can be processed with a single pump version.

### Reliable operation

The pump can be installed in various positions without affecting its function.

### High savings in flushing volume & material consumption

The optimized geometry with smaller internal volume ensures high savings during color changes and pump cleaning.

### Easy integration

The controller can be mounted either laterally or longitudinally.

## Technical data

Characteristics	Values
Pressure ratio	1:1
Operating pressure	1.5 - 8 bar
Volume flow with free outflow	10 l
Volume flow per double stroke	40 cm <sup>3</sup>
Material input	G 1/2"
Material output	G 3/8"
Air output	G 1/4"
Material temperature	4 - 40 °C
Material pH value	3.5 - 9
Wetted parts	Nickel-plated aluminum
Diaphragm material	PA 11
Dimensions (mm)	192 x 142 x 175 (WxDxH without controller) 192 x 165 x 265 (WxDxH with controller)
Weight	3.1 kg without controller 4.1 kg with controller

## Available spraypacks

Components	Spraypack Wall mount	Spraypack Trolley	Spraypack Drum cover	Spraypack Frame, suction hose	Spraypack Frame, hopper
Pump with air control unit	•	•	•	•	•
Circulation	•	•	•	•	•
Drum cover			•		
Wall mount	•				
Large frame				•	•
Trolley		•			
Suction hose	•	•		•	
5 l hopper					•

A wide range of accessories is available for an optimal use of the **WAGNER TOPFINISH DD10** in different application areas. These include frames and trolleys, various fastening systems for the suction hose as well as filters and gun distributors.
